

1st Blood Analysis (July 2017)

Bright Light microscopy

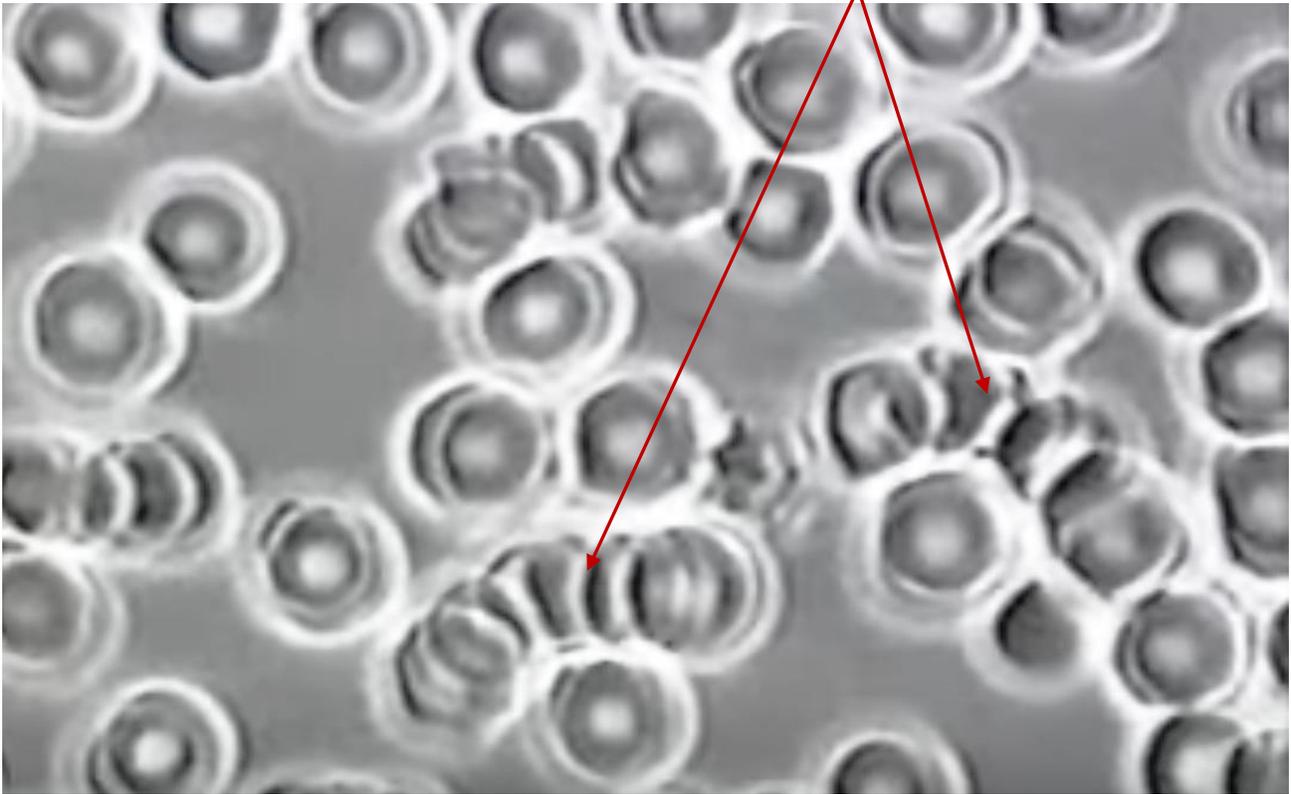

NOTE: Wall thickness good, but irregular shape of RBC walls

Dark Background view of majority Cells in Sample

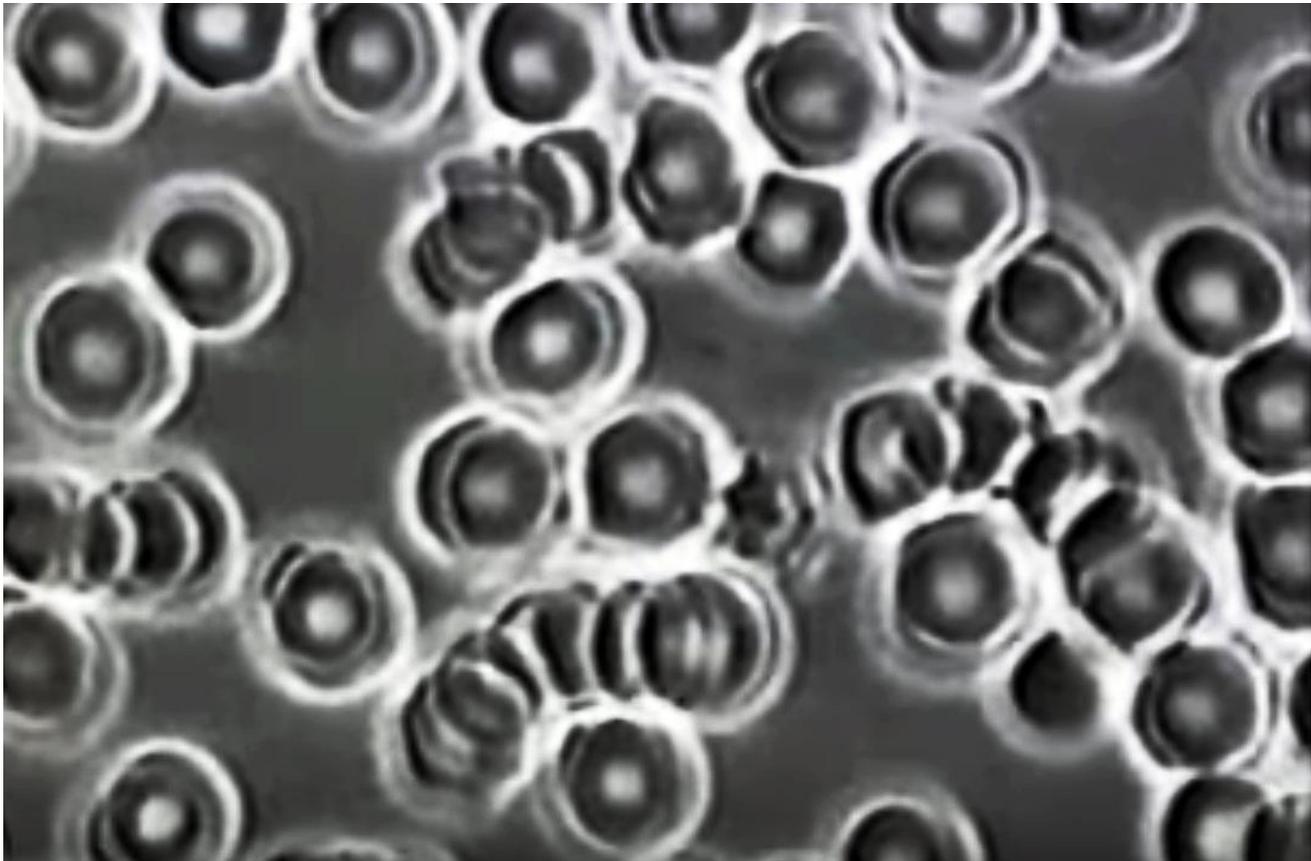

1st Analysis July 2017 **Everything was NOT great**

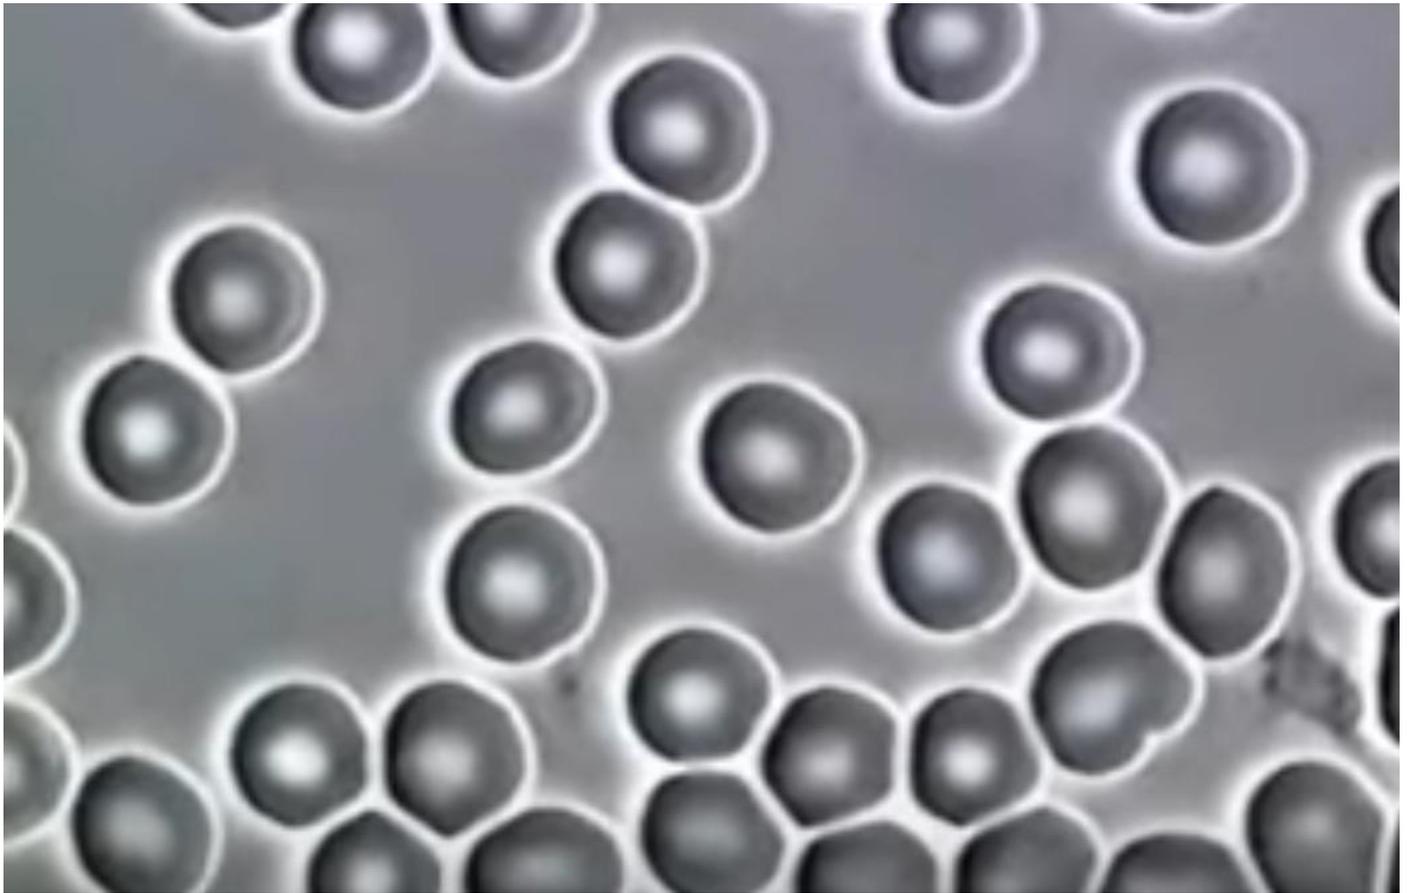

Some clumping of Cells (Rouleau)

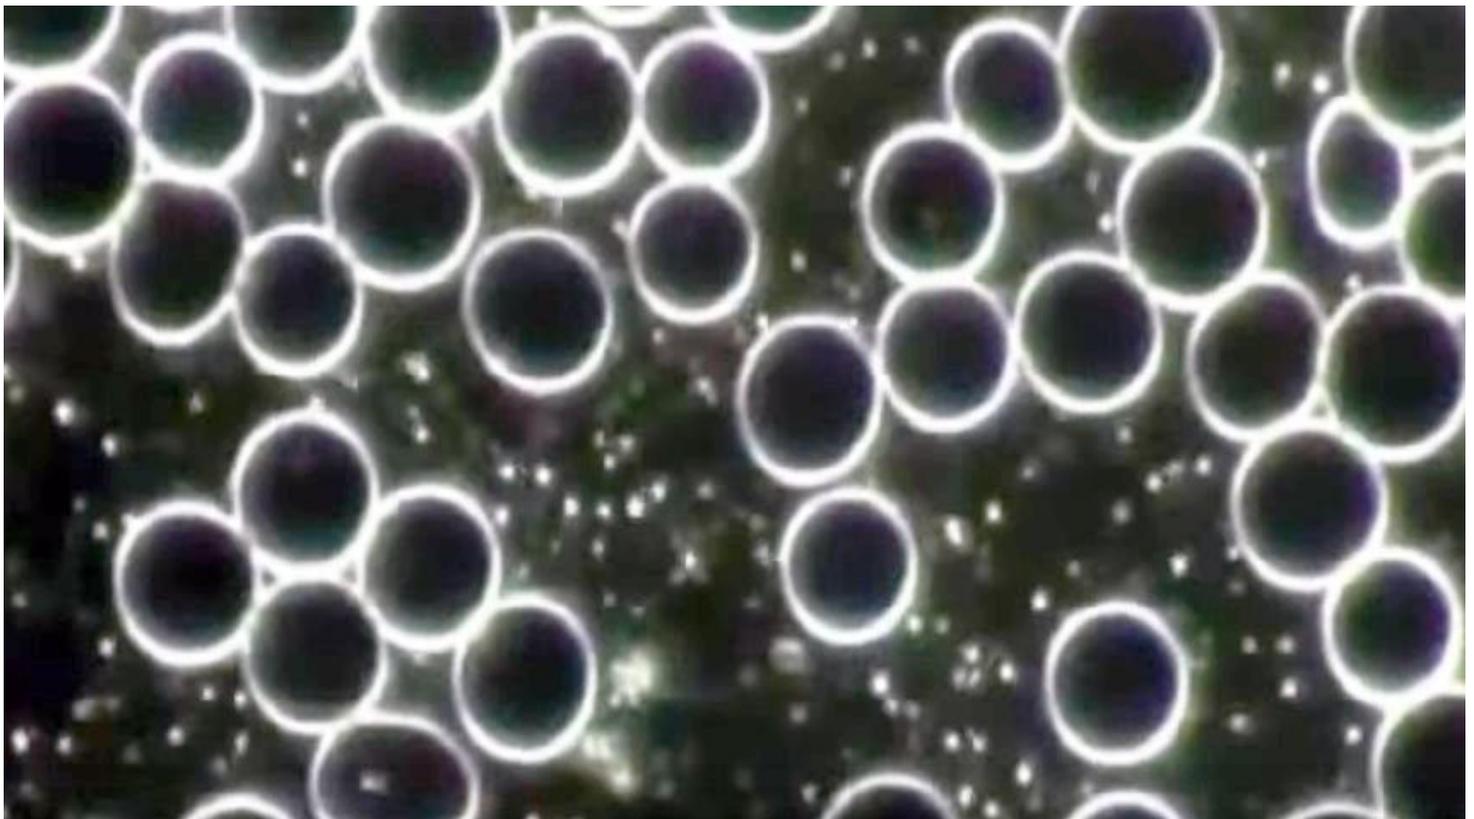

Some clumping of Cells (Rouleau) light above and Dark below

2nd Blood Analysis (October 2017)

Similar results to 1st analysis 3 months earlier – improved wall thickness and RBC shape **NO Rouleau**

3rd Blood Analysis (March 2018)

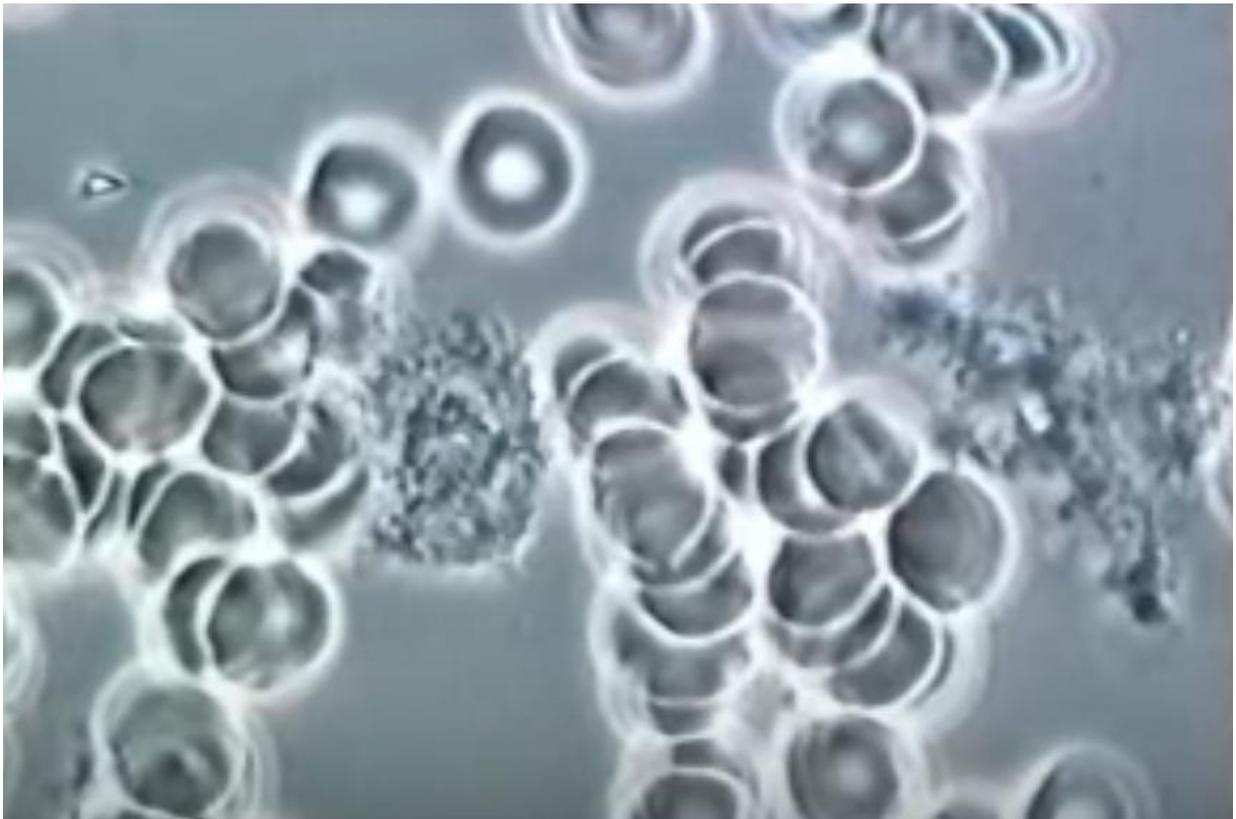

DISASTER Strikes

After 3 weeks WITHOUT Omnium1 PEMF therapy

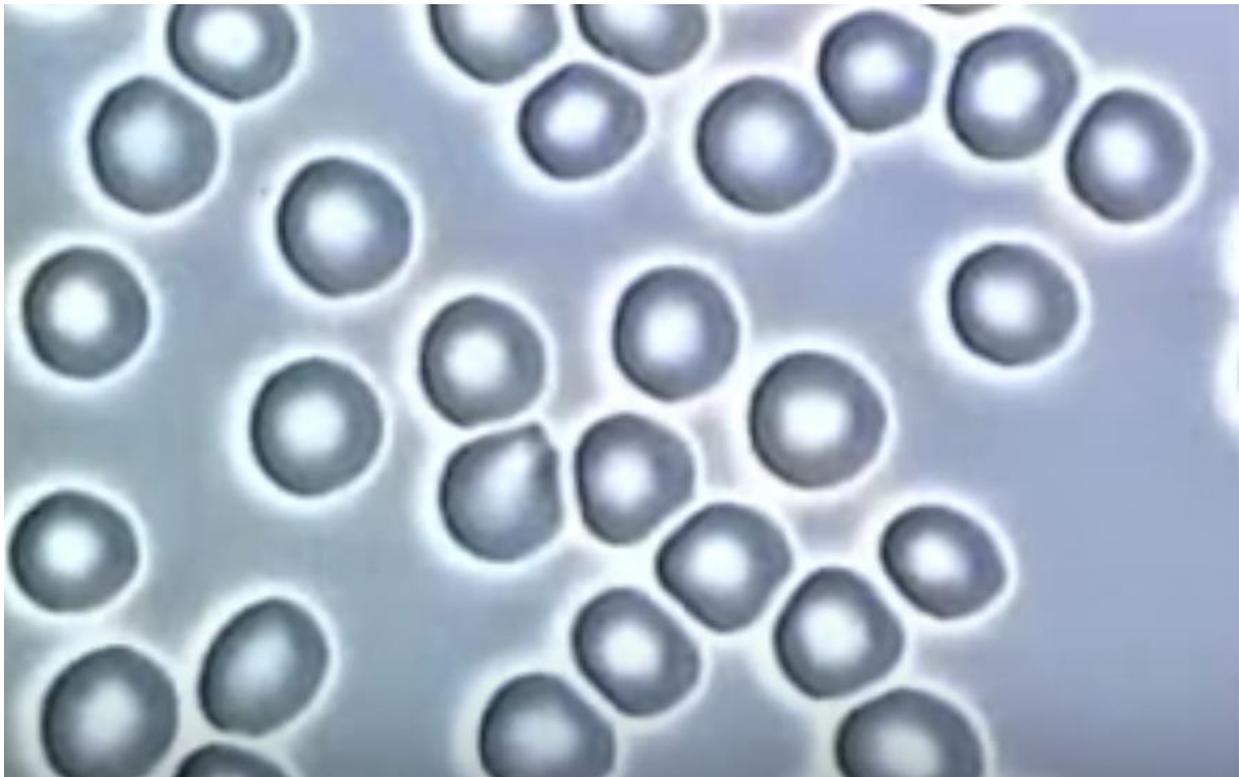

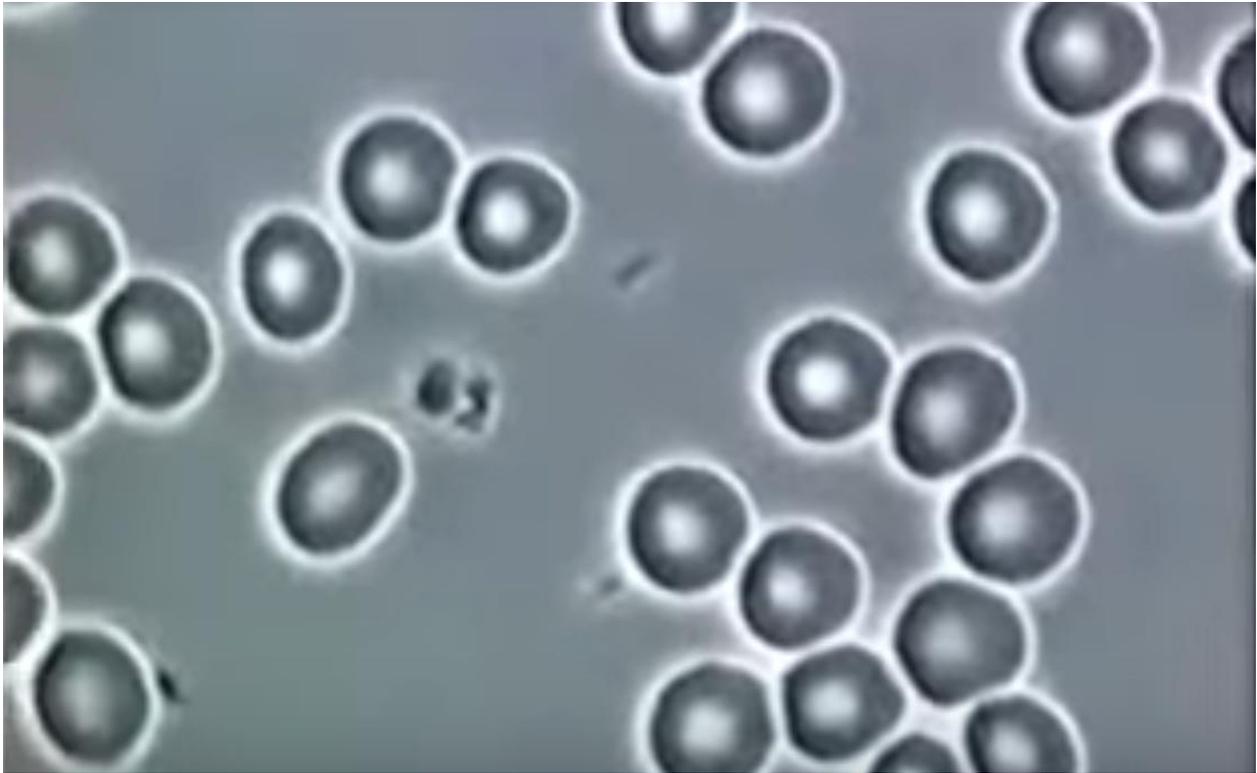

Massive Rouleau

Increased risk of Stroke, Heart Attack, Hi Blood Pressure, Confusion, SOB, Fatigue

4th Blood Analysis
(3 weeks after renewing Omnium1PEMF therapy)

Healthy Cells again..... **Omnium1 PEMF**

I will NEVER ever MISS my Optimum 1 mat again.....NEVER !!!!
